

## Build your career with DLA

Group DLA offers a rewarding place to develop your career, whether you're starting out, or an experienced professional.

### Building a better Australia

**We are a top-tier building code and private certification consultancy firm specialising in the commercial, retail, education, healthcare, aged care, infrastructure and government sectors.**

As a highly experienced team of accredited certifiers and consultants, we influence the design, planning, and functionality of buildings. We consult with a range of public and private clients across multiple sectors, working together to create a safer and more accessible environment for all Australians to live and work in.

## What we offer you

### EXPOSURE

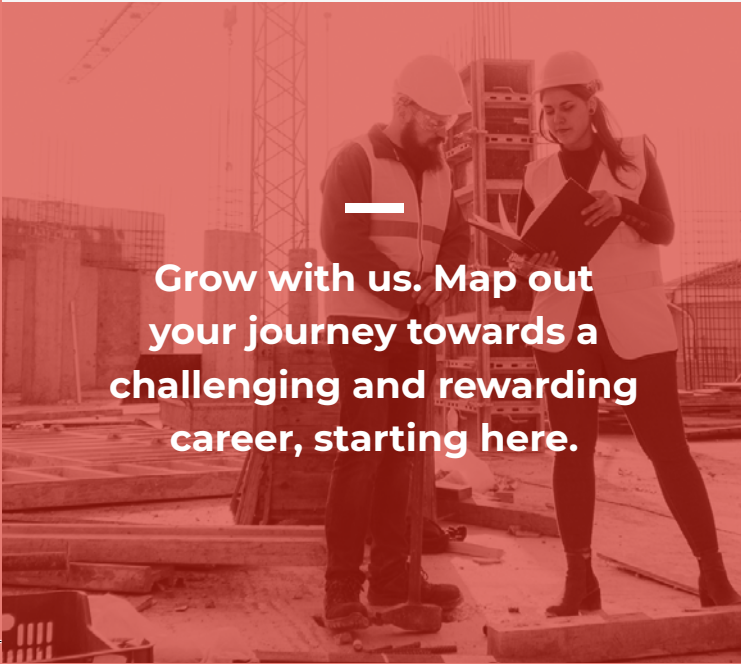

We offer students unrivalled exposure to a variety of high-profile projects across all major sectors and in various regulatory environments.

### EXPERTISE

Learn from the diverse experience and expertise of our team of professionals, who are industry leaders in property consultancy services.

### EMPOWERMENT

We'll provide you with the support and resources you need to help you successfully complete your studies and reach your academic goals.

Grow with us. Map out your journey towards a challenging and rewarding career, starting here.

Our cadetship program is tailored for graduates and soon-to-be graduates, offering an accelerated pathway into the emerging field of building certification and consultancy.

Advance your education while completing your studies and pursuing your career goals. Gain access to high-profile projects, learn from the expertise of industry leaders, collaborate with our broad network of affiliations, and benefit from our extensive resources.

**The future is you. Join our team, discover your unique potential, and build a better tomorrow.**

## Market leaders in innovation

Building regulations in our country are complex and constantly evolving.

We provide expert advice and deliver innovative solutions to ensure that our client's infrastructure is safe, accessible, energy efficient, and compliant with the Building Code of Australia.
